

New Black Variants

WALRUS AUDIO CORE LINE UPDATE | NEW BLACK VARIANTS

JULIA V2 BLACK
Analog Chorus / Vibrato

71339

JULIANNA BLACK
Deluxe Chorus / Vibrato

71340

AGES BLACK
Five-State Overdrive

71336

EONS BLACK
Five-State Fuzz

71338

ERAS BLACK
Five-State Distortion

71337

- Fully analog chorus/vibrato with LFO modulation and blend control for flexible tone shaping
- Continuous D-C-V control enables seamless transition between dry, chorus and vibrato sounds
- Lag control adjusts LFO response, covering subtle movement to deep, warbling modulation

- Stereo chorus/vibrato platform based on Julia with expanded modulation and routing options
- Tap tempo and multiple LFO waveforms allow precise and dynamic modulation control
- Stereo inputs and outputs enable wide spatial effects for modern rigs and recording setups

- Five-state overdrive with rotary selector for multiple clipping and gain configurations
- Dry blend control preserves clarity by mixing clean signal with overdriven tones
- Wide gain range from transparent boost to saturated, compressed overdrive applications

- Five-mode silicon fuzz offering distinct voicings from tight to heavily gated characteristics
- Variable voltage control adjusts headroom and response from soft compression to aggressive attack
- Highly flexible architecture for classic, modern and experimental fuzz applications

- Five-state distortion with rotary mode selector for versatile high-gain sound shaping
- Tight low-end response supports articulate playing in modern high-gain applications
- Multiple clipping modes deliver a range from focused drive to aggressive distortion textures
