

CARL MARTIN

DUAL COMPRESSOR LIMITER

The Carl Martin Dual Compressor Limiter continues the legacy of a celebrated compression design — musical, smooth and sustaining — now reimagined with two presets for greater flexibility. With studio-grade compression, shared THRESHOLD and DRY blend, and individual COMP/LEVEL per side, it delivers everything from subtle dynamic control to rich, sustaining squeeze. A compact pedal that captures the spirit of a legendary approach to compression, with more versatility and headroom for modern players.

SPECIFICATIONS

- **Input:** 1M Ohm
- **Output:** 800 Ohm
- **S/N Ratio:** 105 dB (clean out)
- **THD Distortion:** 0.05%
- **Threshold Range:** 60 dB
- **Compression Range:** from 1:1 to 30:1
- **Level Range:** ± 20 dB
