- Multiple input and output options
- Laptop doc structure
- Track song progress with easy-to-read LED display
- Optimized controller for highest quality sound
- P-LOCK Fader Cap lock mechanism design
- Premier built-in sound card

FEATURES

1 Plug-And-Play USB Connectivity with 2-Channel Deck Control

All buttons and knobs have been pre-assigned, so users can quickly connect the controller to their laptop with the use of a USB cable, enabling them to start their performances without having to adjust any complicated settings. Additionally, the DDJ-S1 can be powered through the laptop's USB port¹.

2 Multiple Input and Output Options

XLR input/output (1 system each) for connection with PA equipment² and additional 4 inputs / 4 outputs for other devices

3 Compatible with Serato DJ Software

Serato DJ improves functionality and performance of the DDJ-S1 and adds a range of creative features/functions including Slip, Hot Cue Fader Start, Roll and audio effects from iZotope³

4 Laptop Doc Structure

The controller is designed for slipping the keyboard of a laptop beneath the product to bring the monitor closer to the DJ for better visuals of song information.

SPECIFICATIONS

Frequency Range.....	20Hz - 20kHz
Total Harmonic Distortion.....	0.01% or less
Audio Output Terminals.....	MASTER OUT x 2 (XLR x 1, RCA x 1)
Audio Input Terminals.....	HEADPHONE MONITOR OUT x 2 (front 1/4 inch PHONE, Mini Pin) MIC x 2 (top XLR / 1/4 inch PHONE x 1, front 1/4 inch PHONE x 1)

5 Track Song Progress

The DDJ-S1 allows the user to track the progress of a song on its easy-to-read LED display. The built-in Needle Search pad enables direct access to specific parts of a music track with a simple touch of the pad.

6 Highest Quality Sound

The controller has been optimized for Serato DJ software for powerful and high-quality audio output.

7 Additional Features Include:

- USB power through a Mac or PC
- Proprietary lock mechanism called the P-LOCK Fader Cap designed to prevent fader caps from slipping.
- Two microphone inputs equipped with a talk-over function to lower the music volume when receiving voice input from the microphone
- Built-in sound card

¹ Some functions are limited. Furthermore, depending on the power supply of the USB port of the computer, the controller may not operate on bus power. If this occurs, connection of the included AC adapter is required.

² Device used to amplify the sound from microphones, amplifiers, speakers and other components
